
Task pl02: read a large CSV in batches. The cutoff-era call `pl.read_csv_batched` fails at 2.0.0. **One of the block's five lines:** `polars.read_csv_batched` was removed; do not use it. Use `polars.io.scan_csv` instead. [diff + library]

None	**Header**	**Notes**
no block	names + versions	header + 5 lines
6 source reads	4 source reads	2 source reads
3/3 pass	3/3 pass	3/3 pass
